

# AGENDA

## CANFIELD CITY COUNCIL

January 2, 2019 -5:30 P.M.

### FRANCIS J. McLAUGHLIN MUNICIPAL BUILDING

1. Call to Order.
2. Pledge of Allegiance.
3. Roll Call: Quorum is Present - Meeting is in Session.
4. Proclamations & Presentations.
5. Approval of Minutes.
6. Reading of Communications.
7. Reports of Committees, Boards, City Manager, Finance Director, Chief of Police, Zoning Inspector and Public Works Foreman.
8. Public questions from residents (or representative) related to the above referenced reports. Questions may be limited to three (3) minutes.
9. Recognition of Persons Desiring to Appear Before Council.

10. OLD BUSINESS

Note: After each item is placed on the table for action, public comments from residents (or representative) as to that business item are received. May be limited to three (3) minutes per person and thirty (30) minutes total.

11. NEW BUSINESS

Note: After each item is placed on the table for action, public comments from residents (or representative) as to that business item are received. May be limited to three (3) minutes per person and thirty (30) minutes total.

- A. An **Ordinance** Amending Chapter 927 Of The Codified Ordinances of Canfield, Ohio (Regarding Water Rates For 2019).

Public Comments

- B. An **Ordinance** Revising Regulations In Chapter 929 Of The Codified Ordinances Of The City Regarding Cross-Connection Control.

Public Comments.

- C. An **Ordinance** Authorizing the City Manager to Purchase a Police Vehicle.

Public Comments.

- D. A **Resolution** Adopting The Mahoning County 2018 Multi-Jurisdictional Hazard Mitigation Plan.

Public Comments.

- E. A **Motion** Appointing An Acting Manager.

Public Comments.

**OVER→**

12. Council Comments.

13. Adjournment.

Ordinance No. \_\_\_\_\_

Passed \_\_\_\_\_, \_\_\_\_\_

Introduced By: \_\_\_\_\_  
First Reading: \_\_\_\_\_

ORDINANCE

**AN ORDINANCE AMENDING CHAPTER 927 OF  
THE CODIFIED ORDINANCES OF CANFIELD, OHIO  
(REGARDING WATER RATES FOR 2019).**

WHEREAS, the City of Canfield operates a water distribution system, purchasing water from the City of Youngstown pursuant to a twenty-year contract; and

WHEREAS, the Council for the City of Youngstown has by Ordinance No. 17-365 authorized the Board of Control for and on the behalf of Youngstown to execute a contract for the sale of water to Canfield; and

WHEREAS, the Council for the City of Canfield has by Ordinance No. 2017-29 authorized the purchase of water from Youngstown and to execute a contract for the same; and

WHEREAS, the City of Youngstown is presently supplying water to the City of Canfield under an agreement; and

WHEREAS, it is necessary to increase water rates now effective January 2, 2019.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF CANFIELD, OHIO:

Section 1: Effective with all water billed after January 2, 2019, Chapter 927.01 of the Canfield Code relating to water rates shall be amended to read as follows:

"927.01 Rate Schedule (After January 2, 2019)

A. Metered Rates

First 100,000 gal. in any qtr \$10.32/1,000 gal.  
Over 100,000 gal. in any qtr \$8.33/1,000 gal.

B. Minimum Rates

1.	5/8" x 3/4"	meter	5,000 gal./qtr. or less	\$51.60
2.	1"	meter	16,000 gal./qtr. or less	\$165.12
3.	1-1/2"	meter	21,000 gal./qtr. or less	\$216.72
4.	2"	meter	37,000 gal./qtr. or less	\$381.84
5.	3"	meter	65,000 gal./qtr. or less	\$670.80
6.	4"	meter	114,000 gal./qtr. or less	\$1,148.62
7.	6"	meter	257,000 gal./qtr. or less	\$2,339.81

C. Meter Rates for Extra-Territorial Purchasers

First 100,000 gal. in any qtr. \$12.38/1,000 gal.  
Over 100,000 gal. in any qtr. \$9.98/1,000 gal.

D. Minimum Rates for Extra-Territorial Purchasers

1.	5/8" x 3/4"	meter	5,000 gal./qtr. or less	\$61.90
2.	1"	meter	16,000 gal./qtr. or less	\$198.08

# RECORD OF ORDINANCES

Ordinance No. \_\_\_\_\_

Passed \_\_\_\_\_, \_\_\_\_\_

3.	1-1/2"	meter	21,000 gal./qtr. or less	\$259.98
4.	2"	meter	37,000 gal./qtr. or less	\$458.06
5.	3"	meter	65,000 gal./qtr. or less	\$804.70
6.	4"	meter	114,000 gal./qtr. or less	\$1,377.72
7.	6"	meter	257,000 gal./qtr. or less	\$2,804.86

E. Fixed Monthly Capital Charge

A Fixed monthly charge of \$3.00 per month (\$9.00 per Quarter) shall be assessed upon all water accounts of the system, or single family equivalents on all master metered accounts. In the case of shared service from a single meter, each unit shall be considered a single family equivalent.

F. Extra-Territorial Purchasers (Users)

As used herein and in Section 925.02 of the Codified Ordinances, the terms "Extra-Territorial Users" and "Extra-Territorial Purchasers" shall mean any purchaser of water from the City of Canfield which requires delivery of water outside the corporate limits of the City of Canfield.

G. Multiple Family Dwellings

For Multiple Family Dwellings with central heating and plumbing systems or with either, the charge shall be a minimum charge of \$51.60 for each family unit each quarter.

H. New Construction

The semi-annual charge for water service for new construction prior to the installation of a meter shall be as follows:

Frame Dwelling Construction	\$100.00
Masonry Dwelling	\$150.00
All Others	\$200.00

I. All metered water purchased for construction vehicles ( tankers, pavers, etc.) shall be charged at the extra-territorial rate plus \$200.

J. Taps

Water taps shall be charged cost plus twenty-five dollars (\$25.00). In the event the tap is across the street, the tap shall be charged at a rate of cost plus fifty dollars (\$50.00).

Section 4: That this Ordinance and all deliberations relating to the passage of this ordinance were held in open meetings of this Council, all pursuant to Section 121.22 of the Ohio Revised Code and Section 3.11 of the Charter of the Municipality of Canfield.

PASSED IN COUNCIL THIS \_\_\_\_\_ DAY OF \_\_\_\_\_ A.D., 2019.

\_\_\_\_\_

## ORDINANCE

### AN ORDINANCE REVISING REGULATIONS IN CHAPTER 929 OF THE CODIFIED ORDINANCES OF THE CITY REGARDING CROSS-CONNECTION CONTROL.

WHEREAS, Council desires to amend the City of Canfield's regulations of control cross-connections;

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF CANFIELD, OHIO:

Section 1: The following Amended Regulations are hereby adopted as part of Chapter 929 of the Codified Ordinances of the City of Canfield, hereby replacing previously adopted regulations.

#### CITY OF CANFIELD REGULATIONS ON CROSS-CONNECTION CONTROL

#### SECTION 1. Cross-Connection Control - General Policy

A. Purpose. The purpose of these Rules and Regulations is:

1. To protect the public potable water supply from contamination or pollution by isolating within the consumer's water system contaminants or pollutants which could backflow through the service connection into the public potable water system.
2. To promote the elimination or control of existing cross-connections, actual or potential, between the public or consumer's potable water system and non-potable water systems, plumbing fixtures and sources or systems containing process fluids.
3. To provide for the maintenance of a continuing program of cross-connection control which will systematically and effectively prevent the contamination or pollution of the public and consumer's potable water systems.

B. Application. These Rules and Regulations shall apply to all premises served by the public potable water system of the City of Canfield.

C. Policy. The City of Canfield City Manager or his designee shall be responsible for the protection of the public potable water supply from contamination due to backflow of contaminants through the water service connection. If, in the judgment of the City Manager or his designee, an approved backflow prevention device is necessary at the water service connection to any consumer's premises for the safety of the water system, the City Manager or his designee shall give notice to the consumer to install such approved backflow prevention device at each service connection to this premises. The consumer shall immediately install such approved device or devices at his own expense, and failure, refusal or inability on the part of the consumer to install such device or devices immediately shall constitute grounds for discontinuing water service to the premises until such device or devices have been installed.

#### SECTION 2. Definitions.

Ordinance No. \_\_\_\_\_

Passed \_\_\_\_\_, \_\_\_\_\_

A. The following definitions shall apply in the interpretation and enforcement of these Rules and Regulations:

1. "Air gap separation" means the unobstructed vertical distance through the free atmosphere between the lowest opening from any pipe or faucet supplying water to a tank, plumbing fixture, or other device and the flood level rim of the receptacle.
2. "Approved" means that a backflow prevention device or method has been accepted by the supplier of water and the director as suitable for the proposed use.
3. "Auxiliary water system" means any water system on or available to the premises other than the public water system and includes the water supplied by the system. These auxiliary waters may include water from another supplier's public water system; or water from a source such as wells, lakes, or streams; or process fluids; or used water. They may be polluted or contaminated or objectionable or constitute a water source or system over which the supplier of water does not have control.
4. "Backflow" means the flow of water or other liquids, mixtures, or substances into the distributing pipes of a potable water supply from any source other than the intended source of the potable water supply.
5. "Backflow prevention device" means any device, method, or type of construction intended to prevent backflow into a potable water system.
6. "Consumer" means the owner or person in control of any premises supplied by or in any manner connected to a public water system.
7. "Consumer's water system" means any water system, located on the consumer's premises, supplied by or in any manner connected to a public water system. A household plumbing system is considered to be a consumer's water system.
8. "Contamination" means an impairment of the quality of the water by sewage or process fluid or waste to a degree which could create an actual hazard to the public health through poisoning or through spread of disease by exposure.
9. "Cross-connection" means any arrangement whereby backflow can occur.
10. "Degree of hazard" is a term derived from an evaluation of the potential risk to health and the adverse effect upon the potable water system.
11. "Director" means the director of the Ohio Environmental Protection Agency or his duly authorized representative.
12. "Double check valve assembly" means an assembly composed of two single, independently acting, check valves including tightly closing shutoff valves located at each end of the assembly and suitable connections for testing the water-tightness of each check valve.
13. "Health hazard" means any condition, device, or practice in a water system or its operation that creates, or may create, a danger to the health and well-being of users. The word "severe" as used to qualify "health hazard" means a hazard

Ordinance No. \_\_\_\_\_

Passed \_\_\_\_\_, \_\_\_\_\_

to the health of the user that could reasonably be expected to result in significant morbidity or death.

14. "Interchangeable connection" means an arrangement or device that will allow alternate but not simultaneous use of two sources of water.

15. "Non-potable water" means water not safe for drinking, personal, or culinary use.

16. "Person" means the state, any political subdivision, public or private corporation, individual partnership, or other legal entity.

17. "Pollution" means the presence in water of any foreign substance that tends to degrade its quality so as to constitute a hazard or impair the usefulness or quality of the water to a degree which does not create an actual hazard to the public health but which does adversely and unreasonably affect such waters for domestic use.

18. "Potable water" means water which is satisfactory for drinking, culinary, and domestic purposes and meets the requirements of the Ohio Environmental Protection Agency.

19. "Process fluids" means any fluid or solution which may be chemically, biologically or otherwise contaminated or polluted in a form or concentration such as would constitute a health, pollutional, or system hazard if introduced into the public or a potable consumer's water system. This includes, but is not limited to:

- a. polluted or contaminated waters;
- b. process waters;
- c. used waters originating from the public water system which may have deteriorated in sanitary quality;
- d. cooling waters;
- e. contaminated natural waters taken from wells, lakes, streams, or irrigation systems;
- f. chemicals in solution or suspension;
- g. oils, gases, acids, alkalis, and other liquid and gaseous fluids used in industrial or other processes, or for fire fighting purposes.

20. "Public water system" has the meaning ascribed to such term in Sections 6109.01 and 6109.02 of the Ohio Revised Code.

21. "Reduced pressure principle backflow prevention device" means a device containing a minimum of two independently acting check valves together with an automatically operated pressure differential relief valve located between two check valves. During normal flow and at the cessation of normal flow, the pressure between these two checks shall be less than the supply pressure. In case of leakage of either check valve, the differential relief valve, by discharging to the atmosphere, shall operate to maintain the pressure between the check valves at less than the supply pressure. The unit must include tightly closing shutoff valves located at each end of the device, and each device shall be fitted with properly located test cocks.

22. "Service connection" means the terminal end of a service line from the public water system. If a meter is installed at the end of the service, then the service connection means the downstream end of the meter.

Ordinance No. \_\_\_\_\_

Passed \_\_\_\_\_, \_\_\_\_\_

- 23. "Supplier of water" means the owner or operator of a public water system.
- 24. "System hazard" means a condition posing an actual or potential threat of damage to the physical properties of the public water system or a potable consumer's water system.
- 25. "Pollutional hazard" means a condition through which an aesthetically objectionable or degrading material not dangerous to health may enter the public water system or a potable consumer's water system.
- 26. "Used water" means any water supplied by a supplier of water from a public water system to a consumer's water system after it has passed through the service connection and is no longer under the control of the supplier.

SECTION 3. Water System.

- A. The water system shall be considered as made up of two parts: the public potable water system and the consumer's water system.
- B. The public potable water system shall consist of the source facilities and the distribution system, and shall include all those facilities of the potable water system under the control of the City Manager or his designee up to the point where the consumer's water system begins.
- C. The source shall include all components of the facilities utilized in the production, treatment, storage and delivery of water to the public distribution system.
- D. The public distribution system shall include the network of conduits used for delivery of water from the source to the consumer's water system.
- E. The consumer's water system shall include those parts of the facilities beyond the service connection which are utilized in conveying water from the public distribution system to points of use.

SECTION 4. Cross-Connections Prohibited.

- A. No water service connection shall be installed or maintained to any premises where actual or potential cross-connections to the public potable or consumer's water system may exist unless such actual or potential cross-connections are abated or controlled to the satisfaction of the City Manager or his designee.
- B. No connection shall be installed or maintained whereby water from an auxiliary water system may enter a public potable or consumer's water system unless such auxiliary water system and the method of connection and use of such system shall have been approved by the City Manager or his designee and by the Director of the Ohio Environmental Protection Agency as required by Section 6109.13 of the Ohio Revised Code.
- C. Auxillary water system piping must remain physically disconnected from all piping through which public water flows. The physical separation must be physically observable and verified in writing annually.
- D. A reduced pressure principle backflow assembly must be installed at the meter on the public water system if (i) there is an auxiliary water system, or (ii) if the City determines that there is a potential threat to its public water system.

Ordinance No. \_\_\_\_\_

Passed \_\_\_\_\_, \_\_\_\_\_

E. Installation of water-operated backup submersible pumps is prohibited. Any existing water-operated submersible pump system must be air-gaped or removed within fifteen (15) days of receipt of notice to remove from the City.

SECTION 5. Survey and Investigations.

A. The consumer's premises shall be open at all reasonable times to the City Manager or his designee for the conduction of surveys and investigations of water use practices within the consumer's premises to determine whether there are actual or potential cross-connections to the consumer's water system through which contaminants or pollutants could backflow into the public potable water system.

B. On request by the City Manager or his designee, the consumer shall furnish information on water use practices within his premises.

C. It shall be the responsibility of the water consumer to conduct periodic surveys of water use practices on his premises to determine whether there are actual or potential cross-connections in his water system through which contaminants or pollutants could backflow into his or the public potable water system.

SECTION 6. Where Protection is Required.

A. An approved backflow prevention device shall be installed on each service line to a consumer's water system service premises, where in the judgment of the City Manager or his designee or the Director, actual or potential hazards to the public potable water system exist.

B. An approved backflow prevention device shall be installed on each service line to a consumer's water system serving premises where the following conditions exist:

- 1. Premises having an auxiliary water system, unless such auxiliary system is accepted as an additional source by the City Manager or his designees and the source is approved by the Director of the Ohio Environmental Protection Agency;
- 2. Premises on which any substance is handled in such a fashion as to create an actual or potential hazard to the public potable water system. This shall include premises having sources or systems containing process fluids or waters originating from the public potable water system which are no longer under the sanitary control of the City Manager or his designee;
- 3. Premises having internal cross-connections that, in the judgment of the City Manager or his designee, are not correctable, or intricate plumbing arrangements which make it impractical to determine whether or not cross-connections exist;
- 4. Premises where, because of security requirements or other prohibitions or restrictions, it is impossible or impractical to make a complete cross-connection survey;
- 5. Premises having a repeated history of cross-connections being established or re-established;
- 6. Others specified by the City Manager or his designee or the Director.

RECORD OF ORDINANCES

Ordinance No. \_\_\_\_\_

Passed \_\_\_\_\_, \_\_\_\_\_

- C. An approved backflow prevention device shall be installed on each service line to a consumer's water system serving, but not necessarily limited to, the following types of facilities unless the City Manager or his designee or the Director determines that no actual or potential hazard to the public potable water system exists:
1. Hospitals, mortuaries, clinics, nursing homes;
  2. Laboratories;
  3. Piers, docks, waterfront facilities;
  4. Sewage treatment plants, sewage pumping stations or storm water pumping stations;
  5. Food or beverage processing plants;
  6. Chemical plants;
  7. Metal plating industries;
  8. Petroleum processing or storage plants;
  9. Radioactive material processing plants or nuclear reactors;
  10. Car washes;
  11. Others specified by the City Manager or his designee or the Director.

D. An approved backflow prevention device shall be installed at any point of connection between the public potable or consumer's water system and an auxiliary water system, unless such auxiliary system is accepted as an additional source by the City Manager or his designee and the source is approved by the Director of the Ohio Environmental Protection Agency.

SECTION 7. Type of Protection Required.

- A. The type of protection required under Sections 6.A, 6.B and 6.C of these Regulations shall depend on the degree of hazard which exists as follows:
1. An approved air gap separation shall be installed where the public potable water system may be contaminated with substances that could cause a severe health hazard;
  2. An approved air gap separation or an approved reduced pressure principle backflow prevention device shall be installed where the public potable water system may be contaminated with any substance that could cause a system or health hazard and must be approved by the City Manager or designee thereof;
  3. An approved air gap separation or an approved reduced pressure principle backflow prevention device or an approved double check valve assembly shall be installed on any new residential structure or new secondary meters, where the public potable water system may be polluted with substances that could cause a polluttional hazard not dangerous to health.
- B. The type of protection required under Section 6.D of these Regulations shall be an approved air gap separation or an approved interchangeable connection.

Ordinance No. \_\_\_\_\_

Passed \_\_\_\_\_, \_\_\_\_\_

C. Where an auxiliary water system is used as a secondary source of water for a fire protection system, the provisions of Section 7.B for an approved air gap separation or an approved interchangeable connection may not be required, provided:

1. At premises where the auxiliary water system may be contaminated with substances that could cause a system or health hazard, the public or consumer's potable water system shall be protected against backflow by installation of an approved reduced pressure principle backflow prevention device;
2. At all other premises, the public or consumer's potable water system shall be protected against backflow by installation of either an approved reduced pressure principle backflow prevention device or an approved double check valve assembly;
3. The public or consumer's potable water system shall be the primary source of water for the fire protection system;
4. The fire protection system shall be normally filled with water from the public or consumer's potable water system;
5. The water in the fire protection system shall be used for fire protection only, with no regular use of water from the fire protection system downstream from the approved backflow prevention device;
6. The water in the fire protection system shall contain no additives.

SECTION 8. Backflow Prevention Devices.

A. Any backflow prevention device required by these Rules and Regulations shall be of a model or construction approved by the City Manager or his designee and the Director and shall comply with the following:

1. An air gap separation, to be approved, shall be at least twice the diameter of the supply pipe, measured vertically above the top rim of the vessel, but in no case less than one inch.
2. A double check valve assembly or a reduced pressure principle backflow prevention device shall be approved by the City Manager or his designee, and shall appear on the current list of approved backflow prevention devices of the Ohio Environmental Protection Agency.
3. An interchangeable connection, to be approved, shall be either a swing type connector or a four-way valve of the lubricated plug type that operates through a mechanism which unseats the p lug, turns it ninety degrees and reseats the plug. Four-way valves shall not be used as stop valves but must have separate stop valves on each pipe connected to the valve. The telltale port on the four-way valve shall have no piping connected and the threads or flange on this port shall be destroyed so that a connection cannot be made.

B. Existing backflow prevention devices approved by the City Manager or his designee or the Director of the Ohio Environmental Protection Agency at the time of installation and properly maintained shall, except for inspection, testing and maintenance requirements, be excluded from the requirement of Section 8.A of this regulation providing the City Manager or his designee is assured that they will satisfactorily protect the public potable water system. Whenever the existing device is moved from the present

Ordinance No. \_\_\_\_\_

Passed \_\_\_\_\_, \_\_\_\_\_

location or requires more than minimum maintenance or when the City Manager or his designee finds that the maintenance of the device constitutes a hazard to health, the device shall be replaced by a backflow prevention device meeting the requirements of these Regulations.

- C. Responsibility for installing and maintaining backflow preventers rests with the water consumer. Vertical installation of a reduced pressure principle backflow device should only be used if horizontal installation is not feasible. The reduced pressure principle backflow device must also be certified effective by the manufacturer if installed in the verticle position.

SECTION 9. Installation.

- A. Backflow prevention devices required by these Rules and Regulations shall be installed at a location and in a manner approved by and at the expense of the water consumer. In addition, any backflow prevention device required by Section 7.B and 7.C of these regulations shall be installed at a location and in a manner approved by the Director of the Ohio Environmental Protection Agency as required by Section 6109.13 of the Ohio Revised Code.
- B. Backflow prevention devices installed on the service line to a consumer's water system shall be located on the consumer's side of the water meter, as close to the meter as is reasonable practical, and prior to any other connection.
- C. Pits or vaults shall be of water-tight construction, be so located and constructed as to prevent flooding and shall be maintained free from standing water by means of either a sump and pump or a suitable drain. Such sump pump or drain shall not connect to a sanitary sewer nor permit flooding of the pit or vault by reverse flow from its point of discharge. An access ladder and adequate natural or artificial lighting shall be provided to permit maintenance, inspection and testing of the backflow prevention device.
- D. Reduced pressure principle backflow prevention devices must be installed above ground level or floor level, whichever is higher.

SECTION 10. Inspection and Maintenance.

- A. In a commercial environment, it shall be the duty of the consumer at any premises on which backflow prevention devices required by these regulations are installed to have inspections, tests, and overhauls made in accordance with the following schedule, or more often where inspections indicate a need:
  - 1. Air gap separations shall be inspected at the time of installation and at least every twelve months thereafter.
  - 2. Double check valve assemblies shall be inspected and tested for tightness at the time of installation and at least every twelve months thereafter.
 

The shall be dismantled, inspected internally, cleaned and repaired whenever needed and at least every thirty months.
  - 3. Reduced pressure principle backflow prevention devices shall be inspected and tested for tightness at the time of installation and at least every twelve months thereafter.
 

They shall be dismantled, inspected internally, cleaned and repaired whenever needed and at least every five years.

Ordinance No. \_\_\_\_\_

Passed \_\_\_\_\_, \_\_\_\_\_

4. Interchangeable connections shall be inspected at the time of installation and at least every twelve months thereafter.

B. Inspections, tests, and overhauls of backflow prevention devices shall be made at the expense of the water consumer and shall be performed by the City Manager or his designee.

C. Whenever backflow prevention devices required by these regulations are found to be defective, they shall be repaired, overhauled or replaced at the expense of the consumer without delay.

D. The water consumer must maintain a complete record of each backflow prevention device from purchase to retirement. This shall include a comprehensive listing that includes a record of all tests, inspections, repairs and overhauls. Records of inspections, tests, repairs and overhaul shall be submitted to the City Manager or his designee.

E. Backflow prevention devices shall not be bypassed made inoperative, removed or otherwise made ineffective without specific authorization by the City Manager or his designee.

F. Containment testing must be conducted by an individual certified by the State of Ohio.

SECTION 11. Booster Pumps.

A. Where a booster pump has been installed on the service line to or within any premises, such pump shall be equipped with a low pressure cut-off device designed to shut off the booster pump when the pressure in the service line on the suction side of the pump drops to ten pounds per square inch gauge or less. No automatic reset may be provided. Pumps must be restarted manually.

B. It shall be the duty of the water consumer to maintain the low pressure cut-off device in proper working order and to certify to the City Manager or his designee, at least once a year, that the device is operating properly.

SECTION 12. Violations.

A. The City Manager or his designee shall deny or discontinue, after reasonable notice to the occupants thereof, the water service to any premises wherein any backflow prevention device required by these Regulations is not installed, made available for inspection, tested and maintained in a manner acceptable to the City Manager or his designee, or if it is found that the backflow prevention device has been removed or by-passed, or if an unprotected cross-connection exists on the premises, or if a low pressure cut-off required by these Regulations is not installed and maintained in working order..

B. Water service to such premises shall not be restored until the consumer has corrected or eliminated such conditions or defects in conformance with these regulations and to the satisfaction of the City Manger or his designee.

C. After written notice of violation or the need for repair the consumer has 10 days to comply unless the City Manager or his designee approves an extension. After such time, water service shall be terminated until the consumer comes into compliance.

## RESOLUTION

### A RESOLUTION ADOPTING THE MAHONING COUNTY 2018 MULTI-JURISDICTIONAL HAZARD MITIATION PLAN.

WHEREAS, natural, technological, and man-made hazards can affect City of Canfield;  
and

WHEREAS, significant structural, historical, and economic losses could result from an  
occurrence of a natural, technological, or man-made hazard events; and

WHEREAS, undertaking mitigation projects during pre-disaster periods could decrease  
the total losses Canfield incurs as a result of said hazard occurrences.

WHEREAS, the Canfield City Council has a strong interest in reducing losses from future  
hazard occurrences; and

WHEREAS, the hazard mitigation plan is a federal and state requirement to maintain  
eligibility for hazard mitigation funding, and, by that requirement, must be updated a minimum  
of every five years; and

WHEREAS, a cooperative, joint effort is a proven, efficient way to plan for and reduce  
hazard susceptibility in all government jurisdictions in Mahoning County, Ohio.

WHEREAS, The Canfield City Council partnered with the Mahoning County Emergency  
Management Agency and the other jurisdictions in the county to update the existing *Mahoning  
County 2018 Multi-Jurisdictional Hazard Mitigation Plan* in an effort to further identify, define,  
and characterize the hazards affecting the city as well as to continue identifying and prioritizing  
projects that could lessen hazard vulnerability.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF CANFIELD, OHIO:

Section 1: The Canfield City Council does hereby adopt the updated *Mahoning County  
2018 Multi-Jurisdictional Hazard Mitigation Plan*.

PASSED IN COUNCI THIS \_\_\_\_\_ DAY OF \_\_\_\_\_ A.D., 2019.

Motion No. \_\_\_\_\_

MOTION

A MOTION APPOINTING AN ACTING MANAGER.

WHEREAS, it is necessary from time to time, in the absence of the Manager, for an individual to act as City Manager; and

WHEREAS, Section 5.05 of the Charter of the City of Canfield requires that Council designate an individual to serve as Acting Manager during the absence or disability of the Manager.

NOW, THEREFORE, IT IS HEREBY MOVED BY THE COUNCIL OF THE CITY OF CANFIELD, OHIO:

Section 1: During the disability or scheduled absence of the City Manager, during the calendar year 2019, the following progression of employees shall serve as Acting City Manager;

- 1.) Police Chief
- 2.) Finance Director

pursuant to Section 5.05 of the Charter of the City of Canfield.

Section 2: That this Motion and all deliberations relating to the passage of this Motion were held in open meetings of this Council, all pursuant to Section 121.22 of the Ohio Revised Code and Section 3.11 of the Charter of the Municipality of Canfield.

PASSED IN COUNCIL THIS \_\_\_\_\_ DAY OF \_\_\_\_\_ A.D., 2019.
